Public Notice

Lake Georgetown Master Plan Study Initiation

The Fort Worth District, U.S. Army Corps of Engineers (USACE), hereby informs the public of the initiation of revision to the Lake Georgetown Master Plan. The Plan is a vital tool produced and used by USACE to guide the responsible stewardship of USACE-administered lands and resources for the benefit of present and future generations.

USACE defines the Master Plan as the strategic land use management document that guides the comprehensive management and development of all recreational, natural, and cultural resources throughout the life of the water resource development project. Public participation is critical to the successful revision of the Master Plan.

Key topics to be addressed in the revised Master Plan include revised land classifications, new natural and recreational resource management objectives, recreation facility needs, and special topics such as invasive species management. Revision of the Master Plan will not address in detail the technical operational aspects of the reservoir related to the water supply or flood risk management missions of the project.

A public meeting will be held on February 12, 2019 at the Lake Georgetown Office, 500 Lake Overlook Rd, Georgetown, TX 78633. A brief overview outlining the purpose and scope of the Master Plan, as well as the proposed schedule and opportunities for public involvement will be presented at 6 p.m., followed by a chance to view maps, ask questions, and provide written comments about the project.

Questions pertaining to the proposed revision can be addressed by mail to Scott Blank, Lake Manager, Lake Georgetown, U.S. Army Corps of Engineers, 500 Lake Overlook Rd, Georgetown, TX 78633 or telephone at (512) 930-5253 with comments, questions, or the need for further information.
