FOR A PROPOSED 54-INCH STORM SEWER REPLACEMENT PROJECT - THE CITY OF  
FORT WORTH M-210 RELIEF SANITARY SEWER SIPHON PROJECT UPSTREAM OF  
UNIVERSITY DRIVE, CLEAR FORK TRINITY RIVER**

The public is hereby notified of the availability of the Draft Finding of No Significant Impact (FONSI) and Supplemental Environmental Assessment (SEA) for the proposed Clear Fork M-210 Part 2 Relief Sanitary Sewer Siphon Project proposed by the City of Fort Worth within the Fort Worth Floodway, Fort Worth, Texas. Proposed modifications to USACE public works by non-federal entities must adhere to 33 U.S.C. Section 408, including National Environmental Policy Act (NEPA) compliance. The City of Fort Worth submitted a Section 408 Request for review, including NEPA compliance coverage under the Programmatic Environmental Assessment (PEA) for Civil Works Minor Section 408 NEPA Compliance dated April 11, 2011, with a Finding of No Significant Impact (FONSI) signed April 15, 2011 as a Future Minor Section 408 Request. Due to riparian woodland impacts, a supplemental environmental assessment was prepared to address impacts not disclosed in the PEA. The Clear Fork M-210 Part 2 Relief Sanitary Sewer Siphon Project is a proposed sewer line replacement and outfall facility located along the south bank of the Clear Fork of the Trinity River between Rodgers Road and South University. Blanton & Associates, Inc., on behalf of the City of Fort Worth, Texas, have prepared a Supplemental Environmental Assessment (SEA) to address NEPA compliance and disclose all associated impacts for public review.

The Draft FONSI and SEA will be available for review at the following locations:
