

**FINDING OF NO SIGNIFICANT IMPACT
ENVIRONMENTAL ASSESSMENT FOR THE
PROPOSED 2024 PROCTOR LAKE SHORELINE MANAGEMENT PLAN
BRAZOS RIVER BASIN
COMANCHE COUNTY, TEXAS**

The U.S. Army Corps of Engineers (USACE) Engineering Regulation (ER) 1130-2-406, requires a shoreline plan as a part of a USACE water resources development project that has a federally owned land base with private shoreline use (also private exclusive use). The proposed revision of the 1976 Proctor Lakeshore Management Plan would incorporate language that supports the natural resources mission statement to “manage and conserve natural resources consistent with ecosystem management principles” as set forth in ER 1130-2-540, and align the proposed 2024 Proctor Lake Shoreline Management Plan with the proposed 2024 Proctor Lake Master Plan, all while ensuring public participation.

In accordance with the National Environmental Policy Act of 1969, as amended, including guidelines in 33 Code of Federal Regulations (CFR), Part 230 and 40 CFR Parts 1500-1508, the U.S. Army Corps of Engineers, Fort Worth District has conducted an environmental analysis on the proposed 2024 Proctor Lake Shoreline Management (SMP). The draft SMP addresses the need for an updated comprehensive land management document for Proctor Lake in Comanche County, Texas.

The revision of the 1976 Proctor Lakeshore Management Plan (hereafter Plan or Management Plan) is a framework built collaboratively to serve as a guide toward appropriate stewardship of USACE administered resources at Proctor Lake over the next 25 years.

The draft Environmental Assessment (EA) for the proposed 2024 Proctor Lake SMP evaluated an alternative that would revise the Management Plan to meet current policy, and its assessment of impacts are summarized in Table 1 and the draft EA are included as reference.

In addition to a “no action” plan, one alternative that fully meets the project purpose was evaluated (proposed action/plan). Chapter 2.0 of the proposed SMP EA discusses the alternative formulation and selection as well the summary of the new objectives. Section 2, and Table 2-1 of the proposed SMP summarizes the changes to the shoreline classifications. The proposed plan includes coordination with the public, updates to comply with the USACE regulations and guidance, and reflects changes in land management and land uses that have occurred since 1976. Shoreline classifications were refined to meet authorized project purposes and current resource objectives that address a mix of natural resources and recreation management objectives that are compatible with regional goals, recognize outdoor recreation trends, and are responsive to public comments.

Table 1: Summary of Potential Effects of the Proposed Plan

Resource	Insignificant effects	Insignificant effects as a result of mitigation	Resource unaffected by action
Aesthetics	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Air quality	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Aquatic resources/wetlands	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Invasive species	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Fish and wildlife habitat	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Threatened/Endangered species/critical habitat	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Historic properties	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Other cultural resources	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Floodplains	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Hazardous, toxic & radioactive waste	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Hydrology	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Land use	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Socioeconomics	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Environmental justice	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Soils	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Water quality	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Climate change	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

All practicable and appropriate means to avoid or minimize adverse environmental effects have been analyzed and incorporated into the proposed plan. The proposed plan will not entail any ground-disturbing activities. Future ground-disturbing activities on USACE property will be subject to all necessary environmental evaluations and compliance regulations.

No compensatory mitigation is required as part of the proposed plan.

Public review of the draft SMP, Environmental Assessment, and Finding of No Significant Impact (FONSI) will be completed on April 19, 2024. All comments submitted during the public review period will be responded to in the final SMP.

Pursuant to Section 7 of the Endangered Species Act of 1973, as amended, the U.S. Army Corps of Engineers has determined that the proposed plan will have no effect on federally listed species or their designated critical habitat.

The proposed plan has No Potential to Effect Historic Properties in accordance with the National Historic Preservation Act, Section 106 (36 CFR Part 800), as amended.

All applicable environmental laws were considered and coordination with appropriate agencies and officials has been completed.

All applicable laws, executive orders, regulations, and local government plans were considered in evaluation of alternatives. Based on the draft report, the reviews by other Federal, State, and local agencies, Tribes, input of the public, and the review by my staff, it is my determination that the proposed plan would not cause significant adverse impacts on the quality of the human environment, therefore, preparation of an Environmental Impact Statement is not required.
