Re: Approval of Remedy Standard A - Residential
Affected Property Assessment Report Waste Disposal Area, June 2008
Former Laredo Air Force Base, Laredo, Webb County, Texas
TCEQ Facility I.D. No. T1612

Dear Ms. Post:

The Texas Commission on Environmental Quality (TCEQ) has reviewed the Affected Property Assessment Report (APAR) for the Waste Disposal Area dated June 2008 and received by the TCEQ on June 26, 2008. Based upon our review of the APAR, Texas Risk Reduction Program (TRRP) Remedy Standard A Residential Protective Concentration Levels (PCLs) have been achieved pursuant to 30 Texas Administrative Code (TAC) §350.79(2)(A) such that no institutional control or post-response action care is required. No further action is required under 30 TAC §350 for the above-referenced area.

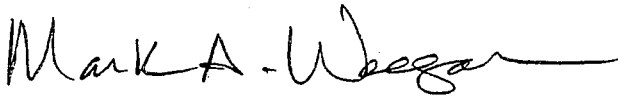

In order to attain Remedy Standard A under TRRP, all industrial solid waste and municipal hazardous waste and waste residues must be removed or decontaminated from affected media (i.e., soil, surface water, groundwater, air, etc.) to applicable human health and ecological based standards and criteria. In order to be released from the requirement to file an institutional control in accordance with 30 TAC §350 Subchapter F, contaminants that remain in place must not exceed Residential PCLs.

Please be aware that it is the continuing obligation of persons associated with a site to ensure that municipal hazardous waste and industrial solid waste are managed in a manner which does not cause the discharge or imminent threat of discharge of waste into or adjacent to waters in the state, a nuisance, or the endangerment of the public health and welfare as required by 30 TAC §335.4. If the activities described in the report fail to comply with these requirements, please take any necessary and authorized action to correct such conditions. A TCEQ field inspector may conduct an inspection of the site to determine compliance with the report.

Ms. Beverly Host

Questions concerning this letter should be directed to me at (512) 239- 2360. When responding by mail, please submit an original and one copy of all correspondence and reports to the TCEQ Environmental Cleanup Section I at Mail Code MC-127 with an additional copy submitted to the local TCEQ Region Office. The information in the reference block should be included in all submittals.

Sincerely,

Mark A. Weegar, P.G., Senior Project Manager
Team 1, Environmental Cleanup Section I
Remediation Division
Texas Commission on Environmental Quality
