Benbrook Lake Master Planning Revision

The U.S. Army Corps of Engineers is in the process of revising the land classification in the Benbrook Lake Master Plan. The Master Plan revision will guide the land and recreational management of the federally-owned property that makes up the lake and its shoreline for the next 25 years. Management activities include protecting natural and cultural resources, providing public land and water recreation, protecting the public, and ensuring reservoir and dam operations.

Updated Land Classification Definitions

Project Operations: Lands required for the dam, operations center, office, maintenance compound, and other areas that are used solely for project operations.

High Density Recreation: Lands developed for intensive recreational activities by the visiting public, including developed recreation areas and areas for marinas and related concessions and resorts.

Multiple Resource Land

- **Low Density Recreation:** Activities such as hiking, primitive camping, wildlife observation, and hunting.
- **Wildlife Management:** Fish and wildlife management activities.
- **Vegetative Management:** Management activities for the protection and development of a specific vegetative cover.
- **Future & Inactive Recreation:** Compatible with potential future recreational development or recreation areas that are closed.

Environmentally Sensitive Areas: Lands where scientific, ecological, cultural, or aesthetic features have been identified. These areas must be considered by management to ensure they are not adversely impacted.

We need your comments on the effort to revise the 1972 Benbrook Lake Master Plan. Your participation is a key element in producing a meaningful and useful Plan. The presentation used at the public information meeting as well as the 1972 Master Plan is available for review at the website to the right. Please write your questions, comments, or suggestions on the comment card. Feel free to use additional pages if needed. Written comments may be submitted at the public meeting, e-mailed, or mailed within 30 days.

Additional information, the Master Plan, meeting presentation, and comment sheets can be found at the following address:
