

Hello, my name is Eric Irwin and I work for the US Army Corps of Engineers in the Regional Planning & Environmental Center where I am the Program Lead for the Lake Master Plan Program in Southwest Division.

On behalf **Rob Jordan** the Lake Manager, and myself welcome to the Public Involvement Presentation for the master plan revision at **Ray Roberts Lake**. As the country is responding to the COVID-19 outbreak, public meetings and workshops which accompany a master plan revision are all cancelled. The presentation you are viewing is the alternative to the Corps hosting face-to-face public meetings or workshops. Public and stakeholder involvement is critical to the success of the master plan revision. Thank you for taking the time to participate.

Purpose of Presentation

- Inform the public and stakeholders that a master plan revision has started
- **Define** a master plan
- **Describe** the master plan **revision process**
- **Provide instructions** on how to participate in the revision process
- **Encourage** participation
- **Provide links** to documents

The purpose of this presentation is to inform the public and stakeholders that a master plan revision has started at **Ray Roberts Lake**. This presentation will define a master plan, describe the master plan revision process, provide instructions on how to participate in the process, and encourage participation. It will also provide links to documents and details about how to contact the Corps to ask questions.

The information provided through public and stakeholder comments is essential to the decision making process of how project lands and water surfaces will be classified and managed. The Corps wants your ideas and comments. After watching this presentation, review the other material on the project website and send in comments and participate in planning the future of **Ray Roberts Lake**.

Topics to be covered in this presentation are summed up under these 8 questions that are often asked in a public meeting or workshop:

- What is a Master Plan?
- Why do a revision?
- What is the revision process?
- What is not part of a Master Plan?
- What is changing in the Plan?
- How can I participate?
- Who can I talk to about the plan?
- When will the Master Plan be done?

Under each of these 8 topics, this presentation will provide details to help you better understand the master plan project and your role in the process.

What is a master plan?

- The master plan is a **25 year comprehensive land use management guide** for recreational, natural, and cultural resources
- **Adheres to Federal laws** to preserve, conserve, restore, maintain, manage, and develop project lands, waters, and associated resources, including the National Environmental Policy Act (NEPA) for environmental stewardship and outdoor recreation
- Provides **land classifications** and **resource management objectives** that are broad and adaptive over time
- Requires and encourages **public involvement**

US Army Corps
of Engineers®

You might be wondering, what is a master plan?

The master plan is the document that will guide the land use and management of the project for the next 25 years, while adhering to all applicable Federal laws including the National Environmental Policy Act, or NEPA. The focus of the plan is the designation of land classifications with corresponding management plans, as well as establishing resource management objectives.

The key to a successful master plan is public involvement.

Participation, in the form of providing written comments, is how you can help.

Why do a revision?

- The current master plan is **out of date** and is **no longer compliant** with new regulations
- **Substantial changes in** environmental, cultural, social, and recreational **conditions have occurred** since the current master plan was approved
- **Re-examine land classification** due to these substantial changes
- The master plan **provides long-term goals** and **consistent management objectives** to guide balanced management of resources and public recreation

Why is the Corps doing a revision to the master plan at this time?

The Corps is undergoing master plan revisions at many of their projects nationwide as existing plans are no longer compliant with current regulations. Many projects have also been influenced by changes in the surrounding environment, either by increased urbanization and growth, or changes in rural patterns of land use. As change is ever constant, an update to the plan is needed to capture how the project land classifications meet the current and future projected uses. Not only does land use change, but also management resources in terms of personnel over time, the master plan provides stability, with long-term goals, and a consistent management strategy, for project resources.

What is the revision process?

The process is a cover-to-cover **review and revision of the entire plan** and is accomplished by:

- **A team of Corps employees** including Operations, Real Estate, Master Planning, and Environmental Compliance subject matter experts
- **Receive input from** and **collaboration with** partners, neighbors, stakeholders, elected officials, resource agencies, and the public
- A thorough review and update of **land and water surface classifications**
- Developing appropriate **NEPA compliance** documents

The revision process includes a cover-to-cover review and update of the entire plan. The revision involves input from the public and stakeholders, but is compiled and completed by a team of Corps employees from a wide array of disciplines. Operations, Real Estate, Master Planning and Environmental Compliance are a few of the subjects where expertise is needed. The revision process will review all of the land and water surface classifications and recommend changes as appropriate. The revision process is a federal action that requires compliance with NEPA, and the appropriate documentation will be a part of the plan.

The revision process includes 3 phases: (scoping, draft and final)

- The scoping phase is when the federal agency asks for initial input from other agencies, citizens and organizations regarding project area, resources and uses. This is the phase we are currently in, as noted by the yellow star on the chart.
- The draft phase is when the Corps asks for public comments on the proposed recommendations in the draft master plan document.
- The final phase is when the Corps incorporates public comments from the draft review into a final master plan document.
- The plan is published after formal approval by the District Commander.

Land Classifications

Source: Engineering Pamphlet or EP 1130-2-550

Land Classification	Definition
Project Operations	Lands required for the dam, spillway, levees, office, maintenance facilities and other areas that are used solely for project operations.
High Density Recreation	Land developed for intensive recreational activities for the visiting public, including day use areas and campgrounds also areas for commercial concessions, and quasi-public development.
Multiple Resource Management Lands	Recreation - Low Density: Lands with minimal development or infrastructure that support passive public recreational use (e.g. trails, primitive camping, wildlife observation, fishing and hunting)
	Wildlife Management: Lands designated for the stewardship of fish and wildlife resources.
	Vegetative Management: Lands designated for the stewardship of forest, prairie, and other native vegetative cover.
	Inactive and/or Future Recreation Areas: Recreation areas planned for the future or that have been temporarily closed
Environmentally Sensitive Areas	Areas where scientific, ecological, cultural or aesthetic features have been identified. These areas must be considered by management to ensure they are not adversely impacted.

The Corps defines land classification as the primary use for which project lands are managed. All Federally owned lands are zoned for development and resource management consistent with project purposes.

Utilizing the current Federal guidance, the land classifications are defined as shown in this table.

The Project Operations classification is used solely for lands dedicated for the operation of the project, including the dam, spillway, levees, project office, and other operational features.

The classification High Density Recreation is assigned to lands that are being used for intensive recreational activities, including day use and campground areas.

The Multiple Resource Management Lands allows for the designation of a predominate use and are subdivided into 4 classifications. All 4 classifications essentially allow for similar activities to occur, but are managed with a particular emphasis, including low density recreation, wildlife management, vegetative management, and inactive or future recreation areas.

The protection of Environmentally Sensitive Areas is given priority, and are for lands with unique scientific, ecological, cultural, or aesthetic features. Examples include endangered species habitat, scenic shorelines, and rare and unique plant communities to mention a few.

Water Surface Classifications

Source: Engineering Pamphlet or EP 1130-2-550

Water Surface Classification	Definition
Open Recreation	Those waters available for year-round or seasonal water-based recreational use.
Restricted	Water areas restricted for project operations, safety, and security purposes.
Designated No-Wake	To protect environmentally sensitive shoreline areas, recreational water access areas from disturbance, and for public safety.
Fish and Wildlife Sanctuary	Annual or seasonal restrictions on areas to protect fish and wildlife species during periods of migration, resting, feeding, nesting, and/or spawning.

Water surface classifications are defined much like land classifications in that they reflect how the water surface is to be managed.

The water surface will be reviewed and classified using 4 classifications. The dominate classification is typically open recreation which allows year round use of the water surface. The other 3 classifications place restrictions on the water surface based on safety, access, shoreline protection, and wildlife needs. Restricted water surfaces do not allow access due to safety and security purposes. No-wake water surfaces limit vessel speeds to protect shorelines from wake damage, and are used near marina and boat ramps for public safety. Fish and wildlife sanctuary water surfaces can be employed on an annual or seasonal basis to restrict access to protect fish and wildlife species.

NEPA Compliance

National Environmental Policy Act (NEPA)

Purpose of NEPA is to:

- Ensure federal agencies give proper **consideration to the environment** prior to undertaking a federal action
- **Involve the Public** (scoping) in the decision-making process
- **Document the process** by which agencies make informed decisions

NEPA Scoping Process:

- Opportunity for **Public comments and questions** on the potential impacts of proposed federal actions
- Includes comments from other federal, state, and local governments, and Tribal Nations

NEPA is the National Environmental Policy Act.

Compliance with NEPA is required during the master plan revision process. NEPA is required so that federal agencies give proper consideration to the environment prior to undertaking a federal action. Scoping during NEPA involves the public in the decision-making process, while documenting the process by which federal agencies make informed decision.

The NEPA process provides the public with the opportunity to ask questions and comment on the potential impacts of proposed federal actions. It also includes comments from other federal, state and local governments, and Tribal Nations.

What is NOT part of a master plan?

- Facility **design details**
- Details of **daily project administration**
- Technical aspects of:
 - Water management for **flood risk management**
 - Regional **water quality**
 - **Water supply**
 - **Shoreline management**
 - **Water level management**
 - **Hydropower**
 - **Navigation**

US Army Corps
of Engineers®

There are topics of public interest that will not be part of the master plan. The master plan does not include facility designs, daily project administration details, or any technical discussion regarding flood risk management, water quality, water supply, shoreline management, water level management, hydropower, or navigation.

What is changing in the plan?

At this point in the revision process **there are no proposed changes**

The Corps is **requesting written comments for RECOMMENDED changes** to the existing master plan

The master plan will be changing from the current master plan.

However, at this point in the Scoping Phase of the process, nothing has been proposed to change. Scoping is where the federal agency asks for initial input from other agencies, citizens, and organizations regarding project area, resources and uses. The purpose of this public involvement presentation is to inform the Public that the master plan revision has started, and collect suggestions and written comment for possible changes to the master plan.

How can I participate?

Submit written comments!

Review all documents available on the USACE website:

<https://www.swf.usace.army.mil/About/Lakes-and-Recreation-Information/Master-Plan-Updates/Ray-Roberts-Lake/>

Documents available for review on the website include:

- Master Plan documents
- Project maps
- Comment form
- Presentation

Spread the word by telling your colleagues, friends and neighbors to participate

You can participate in the process by reviewing the documents available on the website and submit written comments. The Corps will only accept comments in written format. The project website is hosting all the documents relevant to the master plan revision, including the current master plan documents, project maps, comment forms with instructions on how to submit a comment, and copies of this presentation for your review. As the project progresses, and new information is developed, it will be posted to this project website, so you may want to bookmark the site for future reference.

We are asking for your help to spread the word to others, letting them know the master plan revision has been initiated, and this is the opportunity to participate in the process.

How can I participate?

Comments will be accepted only in writing, some of the methods for submitting a comment include:

- You may **download the comment form** provided on the website, fill it out electronically, and email it to the Corps using the submit button on the comment form
- Or you may **print the comment form** provided on the website, fill it out by hand, and mail it to the Corps at the address on the comment form
- Or you may **write a comment or send an email** without using the comment form, and mail or email it to the Corps at the address provided on the website
- Comments are due by close of business on **June 26, 2020**

The Corps can accept any form of written comments and we have provided a few methods that may make it easier to submit.

A comment form has been prepared and is available on the website which you can download and fill out electronically. Hit the submit button on the form, and it will autofill the email address, and you can send it in.

Another method is to print the comment form provided on the website and fill it out by hand, or electronically, and mail it in to the Corps.

Or you can write a comment in a letter, or email, and send it in. You don't have to use the comment form.

We will except all of these methods, and any other, as long as it's a written comment.

The comment period is open for 45 calendar days from the initial announcement.

Who can I talk to about the plan?

Questions about the master plan can be addressed by:

Ray Roberts Lake Office at:

Robert Jordan, Lake Manager

Email: Robert.S.Jordan@usace.army.mil

Phone: 469-645-9100

Fort Worth District Office at:

Joshua Quiring, Project Manager

Email: Joshua.A.Quiring@usace.army.mil

Phone: 817-886-1622

- OR -

Emailing the Corps at:

Email: CESWF-PER-Ray-Roberts@usace.army.mil

If you have questions regarding the master plan, please call or email the following Corps project office or district staff.

You can also send questions to the Email address setup for this project as listed on this slide.

If you need to review a printed copy of the information please contact the lake office to make your request.

When will the master plan be done?

- The master plan will take **18-24 months** to complete
- Projected milestones/schedule

Milestones	Schedule
Public Notification for Scoping	11 MAY 2020
Public Comment Period (45 days)	11 MAY to 26 JUN 2020
Draft Master Plan/EA Public Notification	MAY 2021
Public Comment Period (30 days)	JUN 2021
Final Master Plan/EA Approved	SEP 2021

The master plan will take 18-24 months to complete.

Public notification for scoping initiated on 11 May 2020. The 45-day comment period when written comment are accepted will remain open until 26 Jun 2020.

The draft document is scheduled to be available for public review by May 2021 followed by a public comment period.

The final approved master plan and EA is scheduled for September 2021

Thank you for viewing this presentation and participating in the master plan revision process at Ray Roberts Lake.
