

LAND ALLOCATIONS AND DEFINITIONS

Shoreline (formally Lakeshore) allocations provide for the management of the shorelines of Whitney Lake, as authorized in ER 1130-2-406 dated 31 Oct 1990. Below is a brief description of the land allocations and their definitions:

Limited Development Areas (LDA) - Areas where private activities such as docks and limited vegetation modification are allowed

Public Recreation Areas - Private activities not allowed in or near these areas

Protected Shoreline (Lakeshore) Areas - Protected for wildlife habitat, aesthetics, or shoreline characteristics not conducive to development

Prohibited Access Areas - Areas such as the dam, spillway, water intakes, or other operational features where private activities are prohibited

Questions, Comments, or Suggestions?

We need your thoughts and comments on the effort to revise the 1976 Whitney Lake Shoreline (formally Lakeshore) Management Plan (SMP). Your participation is a key element in producing a meaningful and useful SMP. The presentation given at the public information meeting as well as a copy of the 1976 SMP are available for review at the website listed below. Please write your questions, comments, or suggestions on the provided comment sheet. Feel free to use additional pages if needed. Written comments may be submitted at the public meeting, e-mailed, or sent to the address below within 30 days. Thank you for your participation!

Whitney Lake

Shoreline Management Plan Revision

Public Scoping Meeting May 2019

The U.S. Army Corps of Engineers is in the process of revising the Whitney Lake shoreline allocations. The Shoreline Management Plan addresses the rules and guidelines that govern private shoreline uses, such as private boat docks, vegetation modification, and similar private uses of government property. The Shoreline Management Plan compliments the 2016 Whitney Master Plan.

VISION

"The land, water, and recreational resources of Whitney Lake is managed to protect, conserve, and sustain natural and cultural resources, especially environmentally sensitive resources, and provide outdoor recreation opportunities that complement overall project purposes for the benefit of present and future generations. In the revision of the Shoreline Management Plan, the objective of all management actions will be to achieve a balance between permitted private uses and resource protection for general public use."
