Mr. Mark Wolfe, Executive Director
Texas Historical Commission
1511 Colorado
Austin, Texas 78701

Dear Mr. Wolfe:

The United States Army Corps of Engineers, Fort Worth District (USACE) and the Lower Colorado River Authority, the non-federal sponsor, are evaluating the potential environmental consequences resulting from implementing proposed revisions to the operations rules of Mansfield Dam and Lake Travis in the Highland Lakes region of the Lower Colorado River Basin, Texas. The proposed operating rule revisions were analyzed in the Phase II Flood Damage Evaluation Project study completed in August 2012. The initial Phase I Lower Colorado River Flood Damage Evaluation Project study was completed in July 2002.

USACE has prepared an Environmental Assessment (EA) and Draft Finding of No Significant Impact (FONSI) addressing proposed revisions to the Mansfield (Marshall Ford) Dam and Lake Travis, Colorado River, Texas, Water Control Manual by identifying and evaluating impacts that would result from proposed adjustments to water stage elevations.

A Public Notice has been prepared to notify the public of this action and to solicit comments. The Public Notice, draft FONSI, and EA are enclosed with this communication for your review and to solicit any additional comments or concerns your agency may have regarding this action. We will consider any comments that we receive from you by the close of the comment period as indicated on the Public Notice. Please address any comments you may have to the contact indicated in the Public Notice. Thank you for your cooperation in this matter.

Sincerely,

A handwritten signature in black ink, appearing to read "Eric W. Verwers".
