Assumed Construction Schedule: Dallas Floodway Project

Assumptions:

- Construction planning and design commences in March 2015. Completion date, including Construction Management, is September 2029.
- Larger elements in the flood risk management and interior drainage plan will be constructed first to allow for flood management so that other elements can be constructed last.
- River modifications and wetlands/swales will be constructed following the flood risk management construction.
- Lakes will be constructed following river modifications.
- 277K levee raise and interior drainage plan pump stations may be constructed simultaneously.
- Ecosystem and recreational elements will be constructed following completion of all flood risk management projects and all interior drainage plan elements.

Nonstructural flood control improvements
Wetlands construction

Boat Dock
Weir for river connection
Levee cutoff walls
Whitewater Course
Boat Launch
Water Maze
Fountain Bubblers/Aerators
Fountain Plaza
Canoe Path
